

**Mon 24 Jul 2017 1800 UTC**

A weather map of Europe and the Atlantic region. The map shows a low-pressure system over the Atlantic with a cold front extending eastward and a warm front extending southward. A high-pressure system is located over the British Isles. The map includes isobars, isotherms, and wind vectors. The landmasses are colored in shades of brown and tan, while the sea is white. The map is overlaid with a grid of latitude and longitude lines.

Issued 24-Jul-2017 19:08

**Tue 25 Jul 2017 1200 UTC**

A weather map of Europe and the North Atlantic region. The map features blue contour lines representing pressure systems. A prominent low-pressure system is centered over the North Atlantic, with several concentric contours. Another low-pressure system is visible over the British Isles. High-pressure systems are shown over the Mediterranean and the eastern part of Europe. Small colored arrows (green, red, blue) indicate wind direction and speed. The landmasses are shaded in brown, and the sea level is white.

**Wed 26 Jul 2017 1200 UTC**

A weather map of Europe and the North Atlantic region. The map features blue contour lines representing pressure or temperature, with a prominent low pressure system (cyclone) centered over the North Atlantic, east of the British Isles. Red and green arrows indicate wind direction and speed. The landmasses of Europe, Africa, and parts of Asia are shown in brown, while the sea is white. A white box with a blue border in the top left corner contains the date and time. In the bottom left corner, the text 'Issued 24-Jul-2017 19:08' is displayed in a light grey font.

**Thu 27 Jul 2017 1200 UTC**

A weather map of Europe and the North Atlantic region. The map features a low-pressure system (cyclone) centered over the British Isles, indicated by concentric blue contour lines. Wind vectors are shown as small arrows with color-coded tails (green, red, blue). The landmasses are shaded in brown, and the sea level is white. The map covers the area from approximately 10°W to 30°E and 40°N to 70°N.

Issued 24-Jul-2017 19:08

**Fri 28 Jul 2017 1200 UTC**

A weather map of Europe and the North Atlantic region. The map features blue contour lines representing pressure systems. A prominent low pressure system is centered over the British Isles, with concentric contours indicating a deepening low. To the west, another low pressure system is visible over the North Atlantic. High pressure systems are shown as closed contours over the Mediterranean and the North Sea. Green arrows indicate wind direction and speed, showing a flow from the high pressure areas towards the low pressure areas. The landmasses of Europe, Africa, and parts of Asia are shown in brown, while the oceans are white.

Issued 24-Jul-2017 19:08

**Sat 29 Jul 2017 1200 UTC**

A weather map of Europe and the North Atlantic region. The map features blue isobars representing pressure systems, with a prominent low-pressure system centered over the North Atlantic and another low over the British Isles. Wind vectors are shown as small green and blue arrows, indicating wind direction and speed. Landmasses are shaded in brown, and the sea level is white. The map is overlaid with a grid of latitude and longitude lines.

Issued 24-Jul-2017 19:08

**Sun 30 Jul 2017 1200 UTC**

A weather map of Europe and the Atlantic region. The map features brown landmasses and white oceans. Blue contour lines represent pressure systems, with a prominent low-pressure system centered over the North Atlantic and another low over the Mediterranean. Green arrows indicate wind vectors, showing a flow from the southwest towards the North Atlantic low. Red arrows indicate wind vectors, showing a flow from the east towards the Mediterranean low. The map is overlaid with a grid of latitude and longitude lines.

Issued 24-Jul-2017 19:08

**Mon 31 Jul 2017 1200 UTC**

A weather map of Europe and the North Atlantic region. The map features blue contour lines representing pressure or temperature, with a prominent low-pressure system centered over the British Isles. Wind vectors are shown as small arrows, with red arrows indicating stronger winds. The landmasses are colored in shades of brown and tan, while the oceans are white. The map is overlaid with a grid of latitude and longitude lines.
